Phase #1: Pre-Election Setup

Delivery, staging, configuration, and testing of Dominion voting machines. Logic & Accuracy testing support and polling location setup assistance.

Phase #3: Election Day Support

Specialists at designated locations, hotline support for poll managers, and coordination for closing procedures and results transmission.

Tier #2: Medium County Pricing

Estimated: \$45,000 – \$65,000. Includes 3-5 technicians, dedicated remote command-center support, and on-site specialists.

Why: Proven Experience

Led original statewide Dominion rollout in Georgia. Team trained specifically on Dominion hardware, workflows, and compliance requirements.

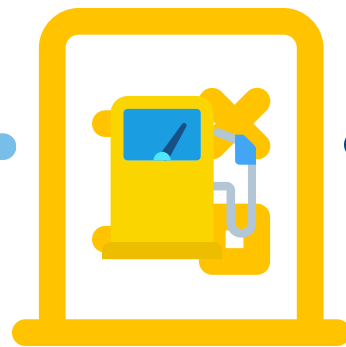

Phase #2: Early Voting Support

On-site or on-call technical staff providing rapid response for equipment issues, daily reporting, and escalation procedures during early voting.

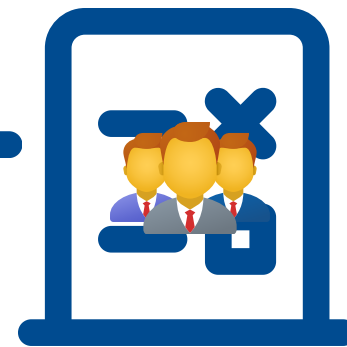

Tier #1: Small County Pricing

Estimated: \$18,000 – \$25,000. Includes 1-2 technicians, early-voting support, and remote support team access for rural operations.

Tier #3: Large County Pricing

Estimated: \$110,000 – \$150,000. Includes full deployment team (6-10 staff), dedicated technical lead, and priority escalation support.

Next Steps: Tailored Packages

We welcome the opportunity to discuss your specific needs and tailor a support package that fits your operational and budget requirements.
